3.4.3 Number of Patents published/ awarded during the last five years

NIEPA is a specialized institution in the area of Educational Planning and Administration which is an off shoot of Economics of Education bed rocked in Social Sciences. The University has pioneered the methodologies of planning and implementation of decentralized plans under District Primary Education Program (DPEP) and Rashtriya Madhyamik Shiksha Abhiyan (RMSA), which were internationally acclaimed. The database created by NIEPA through the District Information System for Education (DISE) was the largest database in the world. The enormous amount of empirical research carried out by NIEPA has always been a major source of reliable information for evidence based decision making in the education sector. However, we do not have patents per say, as this requires natural or applied science orientation which the university is bereft of due to the very nature of our Institution and its super specialization.
