Digital Archives of Education Documents in NUEPA

All education documents in one place in soft version – this is the purpose of the Digital Repository of Digital Archives of Education Documents being developed and housed in NUEPA. This digital archives/repository provides access to all education documents under one roof, so that no researcher, policy planner and policy analyst needs to go anywhere else. The digital archives would be a major source for reference and research on all aspects, sectors and levels of education system since Independence. It would be an authentic source of information source for formulation of educational policy, planning, structures and system. The digital archives will use latest ICT for design (including high-end fully automatic digital scanner), storage and retrieval of digital documents. Use-friendly software, like LIBSYS would be used with search options like author, title, subject, keywords, place year etc. Generate a *Community of Users* as an extended face of NUEPA.

The users related to education sector will be benefitted by the digitization of all relevant documents. The sources and contents in the digital repository will be accessible to all users by LAN through Intranet at NUEPA. The digital repository will be made accessible through a dedicated portal in NUEPA Website. All users would be able to get a feel of the range and extent of the documents in the digital archives. However, to get access to the full documents, they would have to become Registered Users. The digital archives would have provisions for periodic interactions with the Registered Users for feedback and suggestions for its further development.
